

# Microgrid Solutions

By combining end-to-end microgrid capabilities, reliable products, and extensive experience, **S&C leads the industry in integrating complex microgrids.**

## 16

microgrid projects

## 60+

total generation sources in all projects

## 135,000+

customers benefiting from S&C microgrid solutions

## 50+ MW

generation supported in microgrids

## 45+ Million

customer minutes in online microgrids

### S&C is the industry's only true microgrid integrator.

## The Integrated Microgrid

S&C uses the best equipment, controls, and services to deliver all 12 major microgrid components.

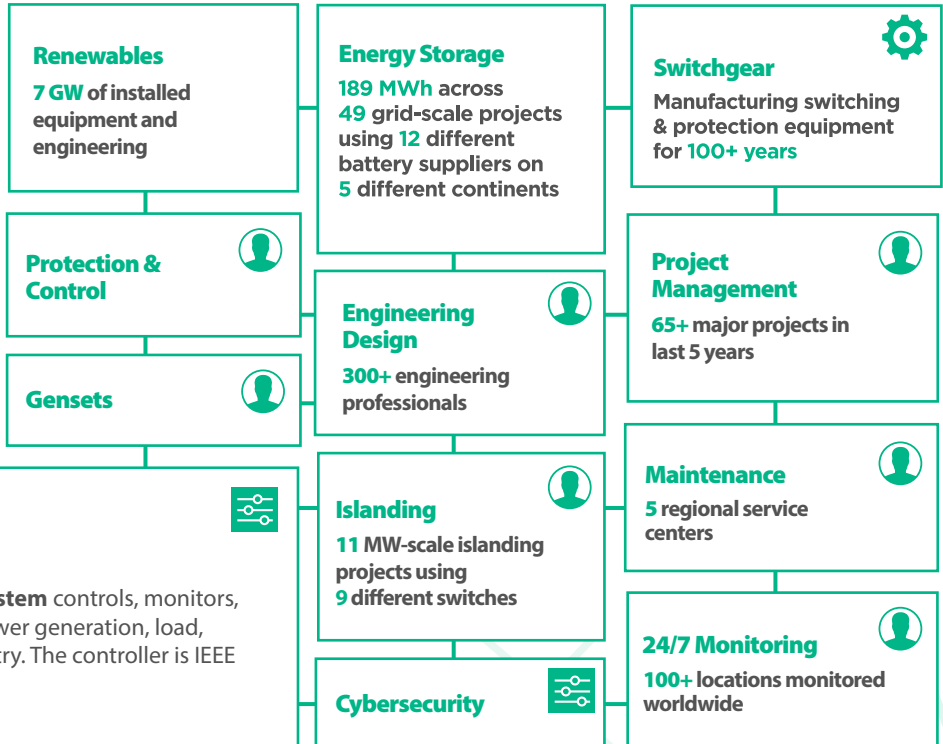

EQUIPMENT

SERVICES

CONTROLS

All applicable utility, military, and cybersecurity standards met or exceeded.

The only integrator to receive an Authorization to Operate (ATO) from the U.S. Department of Defense.

7 layers of cybersecurity defense to protect the core code and microgrid—most industry control systems only have a firewall.

2,000+ control points and values processed every 2 seconds across all existing microgrid projects.
